Mrs McLean Reported that she lives very close to the application and the proposed is to be situated in the village and on three of the sides of the site there are buildings. The proposal is only three feet shorter than Flamborough Lighthouse and there will be constant motion of this imposition at the very front of Mrs McLean's house with constant peripheral movement. The level of noise is predicted at only 5 decibels less than the recognised unacceptable levels. This application will not blend in at Bempton. The Parish Council is also strongly opposed to the application.

Mr Hinde Gave representation regarding the wind turbine application in Bempton and provided the committee with information to support his reasons to oppose and updated the meeting with news that the railway had serious safety implications with this proposal.
